DISCOVER THE CONVENIENCE OF WIRELESS AUTO-START

Makita's Auto-Start Wireless System (AWS™) uses Bluetooth® technology for wireless power-on and power-off communication between the equipped tool and dust extractor. Once connected via AWS™, your dust extractor will automatically power on or off when your cordless tool starts or stops, running only when your cordless tool is in use.

CONNECT WITH BLUETOOTH®

Makita AWS™ (Auto-Start Wireless System) uses Bluetooth® technology for intelligent communication between your dust extractor/vacuum.

INCREASE PRODUCTIVITY

Intelligent Bluetooth® communication using dust extractor only while tool is in use extends battery run time of the dust extractor, increasing productivity on a single charge.

ELIMINATE CORDS

Using our cordless LXT® dust extractor with a cordless LXT® tool means no re-plugging the cord, and reduced trip hazards.

REDUCE EXCESSIVE NOISE

The AWS™ dust extractor / vacuum runs only while the AWS™ power tool is in use, reducing continuous noise at the job or work site.

NEW

XCV08Z

18V X2 LXT® (36V) Brushless 2.1 Gal.
HEPA Filter Dry Dust Extractor/Vacuum, AWS™, (Tool Only)
